

## **Welcome to Martin-Wagner-School**

Our attractive modern school is located in the north-eastern part of Berlin. The school building has modern classrooms and a variety of computer rooms for more than 1,300 students. Our school mirrors the ethnic diversity of Berlin.

We are a vocational training centre specialised in construction. Our dual vocational qualifications comprise bricklayers, carpenters, concrete workers and architectural draftspeople.

In our qualifying courses for college and university entrance our students achieve study-related competences.

Students who failed in secondary school can improve their qualifications in special courses and reach a higher certificate.  
Our unique workshop building with its laboratories perfectly supports the practical training in firms.
